Security Assessment Report

Scan Name	Security Audit Mar 8, 2026
Organization	UOW
Analyst	Ashir Nasveer
Cloud Provider	AWS
Scan Date	2026-03-07 21:06:18 UTC
Status	Completed
Risk Score	71/100

Executive Summary

Severity Distribution — Visual Overview

Compliance Framework Coverage

Framework	Findings	Coverage
CIS: 3.1	3	

NIST: DE.AE-1	3	
ISO: A.12.4.1	3	
PCI: 10.1	3	
NIST: PR.AC-1	2	
CIS: 5.1	2	

Detailed Security Findings

#1. No IAM Password Policy Configured

High

Resource	IAM / password-policy
Compliance	CIS: 1.5 NIST: PR.AC-1 ISO: A.9.4.3 PCI: 8.3.6
Description	No policy set. Default allows trivially weak passwords.
Recommendation	Configure a strong IAM password policy.

#2. EBS Default Encryption Off: ap-southeast-1

High

Resource	EC2 / account/ap-southeast-1
Compliance	CIS: 2.2 NIST: PR.DS-1 ISO: A.8.2.3 PCI: 3.4
Description	New EBS volumes in ap-southeast-1 will be unencrypted by default.
Recommendation	Enable EBS encryption by default in EC2 settings.

#3. No CloudTrail Configured

High

Resource	CloudTrail / account
Compliance	CIS: 3.1 NIST: DE.AE-1 ISO: A.12.4.1 PCI: 10.1
Description	No trails found. All API activity is unlogged.
Recommendation	Create multi-region trail with S3+CW integration.

#4. AWS Config Not Enabled: ap-southeast-1

High

Resource	Config / region/ap-southeast-1
Compliance	CIS: 3.1 NIST: DE.AE-1 ISO: A.12.4.1 PCI: 10.1
Description	Config disabled in ap-southeast-1. No resource tracking.
Recommendation	Enable AWS Config.

#5. Default SG Has Rules: default

Medium

Resource	SecurityGroup / sg-04073370391a3165b
Compliance	CIS: 5.1 NIST: PR.AC-5 ISO: A.13.1.1 PCI: 1.3.2
Description	Default SG should have no rules (CIS).
Recommendation	Remove all rules from default SG.

#6. VPC Flow Logs Disabled: vpc-01969977d86acb92f

Medium

Resource	VPC / vpc-01969977d86acb92f
Compliance	CIS: 3.1 NIST: DE.AE-1 ISO: A.12.4.1 PCI: 10.1
Description	VPC '■' network traffic not logged.
Recommendation	Enable VPC Flow Logs.

#7. NACL All Inbound Allowed: acl-00f53a608a24f7abc

Medium

Resource	VPC / acl-00f53a608a24f7abc
Compliance	CIS: 5.1 NIST: PR.AC-5 ISO: A.13.1.1 PCI: 1.3.2
Description	NACL '■' allows all inbound. Only SGs protect instances.

Recommendation	Add NACL deny rules for common attack ports.
----------------	--

#8. SG Unrestricted Egress: default

Low

Resource	SecurityGroup / sg-04073370391a3165b
Compliance	NIST: PR.IP-1 ISO: A.12.1 PCI: 6.4
Description	SG '■' allows all outbound. Data exfiltration risk.
Recommendation	Restrict egress to required destinations.

#9. Root Account MFA Disabled

Critical

Resource	IAM / root
Compliance	CIS: 1.1 NIST: PR.AC-1 ISO: A.9.4.2 PCI: 8.3.1
Description	Root account has no MFA. Most privileged account in AWS. [CRITICAL: Combined with missing password policy — higher risk]
Recommendation	Enable hardware or virtual MFA on root. Avoid using root for daily tasks.
